Environmental Story

At Humanscale, our approach to product development and manufacturing embodies our mission to minimize our impacts. We believe that the best designs in the world achieve more with less, so we act accordingly.

Summa features a cylinder and base made with an environmentally neutral Chrome 3 finish, rather than Chrome 6 a finish often used in the manufacturing process that is hazardous to users and the environment.

Summa also features Humanscale's chrome-free leather. This alternatively tanned leather uses a synthetic vegetable tanning method to eliminate chromium, a harmful chemical used in most leather tanning methods.
