# Ginkgo Lounge

Designed by Jehs+Laub

Ginkgo Lounge is trademarked by the complex and sculptural curvature of the shell. This family is centered on providing optimum comfort; bringing a relaxed and residential feel with a sophisticated look for a variety of applications. All three versions - Low, Mid, and High Back chairs - offer their own interpretation of comfort and organic design. These styles perfect the natural aesthetic of Ginkgo Lounge showcased through their distinct design personalities.

Ginkgo Lounge Low Back fits flawlessly throughout corporate, educational, and hospitality interiors with matchless comfort and elegance. This petite lounge chair features a perfectly reclined seating angle for instant relaxation. The Low Back is offered with an exposed veneer shell in a variety of finish options or fully upholstered for a wide range of design possibilities.

A variety of base designs are available for the Ginkgo Lounge Low Back, each with their own distinct style. The Four-Prong Pedestal base mimics the Ginkgo Lounge Mid and High Back design; the Wire Base is slender and minimal, highlighting the comfortable angle of the seat; and the Wood Base calls back to the same base of the Ginkgo chair, with the same stylistic veneer details.

Defined by a low profile and generous curves, Ginkgo Lounge Mid Back is the picture of casual modern comfort. The shape and detailing allude to the chair's predecessor while providing a new range of design possibilities and applications.

Ginkgo Lounge Mid Back is a perfect complement to the High Back chair. Extremely adaptable in its classic styling, this signature piece is designed for reception areas, open office lounges, and private executive offices. Ginkgo Lounge Mid Back is offered in fixed, swivel, and self-return bases.

The Ginkgo Lounge family started with the High Back chair, redeveloping the style of the Ginkgo line and centering on providing optimum comfort. Ginkgo Lounge brings a relaxed and residential feel with a sophisticated look to a variety of applications. Ginkgo Lounge High Back features gentle, sloping curves, creating a waterfall effect from the optional headrest to the base. Add a finishing touch of comfort with the Ginkgo Lounge footrest, available with complementary upholstery options.

Ginkgo Lounge makes a big statement with the smallest details. The exposed veneer shell of the Low Back highlights the complex yet delicate curves of the bent plywood design - the signature of the Ginkgo family. A beautiful double-needle stitch detail runs the perimeter of both the Mid and High Back chairs. These chairs also employ an innovative upholstery technique, featured in the exterior back, providing a perfect seam every time with no stitches in sight. An optional headrest may also be added to the High Back chair, providing additional comfort and a slight twist on the original design.
