

teknion district

teknion

A collection of desks, cabinets, windows and walls, District® offers the look and feel of furniture together with the functional features of systems. Its multi-use components offer a myriad of planning options for any office environment.

architectural furniture

District echoes the long, low lines of mid-century modern furniture and, like the design of that era, achieves a remarkable transparency with layered surfaces and a refined scale. District reinterprets the modernist blend of sleek, functional design for the contemporary office.

efficient use of space

District maximizes smaller spaces with products that serve multiple functions. Credenzas and storage support worksurfaces and define space. Overlapping planes and under-surface storage make optimal use of vertical as well as horizontal space.

task seating  
Around: *Digi Tweed,*  
*Sundew Tweed*

District has the look and feel of well-crafted architectural furniture. Multi-purpose credenzas support workspaces and reduce the need for panel-based planning, preserving the distinctive look

of furniture. Layered surfaces and elevated storage lend a distinctive transparency, while stacking cabinets create workstations unique in form and function.

District delivers more out of small spaces. Multi-tiered workstations with overlapping surfaces afford a feeling of spaciousness, and scaled-down versions of traditional storage make optimal use of volume and space within a smaller footprint.

In design and construction, District workstations are aligned with sustainable principles and with LEED® (Leadership in Energy and Environmental Design) guidelines that stress natural light and air circulation in commercial interiors.

Windows up to 96 inches wide preserve an open, light-filled setting while datum lines at worksurface height reflect an emphasis on more transparent workstations for light and unobstructed views. Elevated panel walls and credenzas permit a healthy air flow beneath and between workstations.

Together with Navigate™ and upStage™, District provides multiple surfaces to support different workstyles and tasks, creating an agile untethered workspace. The District credenza stores reference materials while doubling for

casual seating and stacking the upStage bookcase. Navigate counterbalance height-adjustable tables allow users to work seated or standing.

*Full Wool, Hot Stone*

District serves the needs of traditional panel systems while maintaining the design aesthetic of architectural furniture with features such as elevated wall spans up to 96 inches wide. Frost glass windows and screens create privacy while retaining light access. Full-height windows and fascias present a refined, monolithic appearance ideal for corridor applications.

worksurface/storage *Flintwood, Drift Oak*    panel wall trim/leg *Foundation, Ebony*    fascia *Panel Fabric Lastrado, Glassine*    task seating *Sabrina: Iron Mesh; Ample, Sunburst*

The upStage bookcase integrated with District provides shared storage while enabling a reduction of the footprint. Shared stackers serve as functional space division. Inset Glass and Desk-Mounted Glass Screens provide a clean design aesthetic and access to natural light.

*Nuova Contessa: Nu-Tess Mesh Iron*

District features credenzas for height-adjustable tables, further enhancing functionality to a workspace while still maintaining its inherent furniture look. Integration of height adjustability within storage promotes healthy postures, increased physical activity at the workplace and addresses sit-stand worker needs.
