

teknion expansion cityline

teknion

Inspired by the definitive patterns of the urban landscape, Expansion Cityline™ is based on the concept of planning for a workplace as diverse and dynamic as a modern city. Like the public and private places where city dwellers work and play, Expansion Cityline offers a highly active setting that allows people to move, to gather and to disperse as desired.

Expansion Cityline's unique design employs a beam framework that maximizes office connectivity. The beam serves both as a structural spine and as an avenue for data and power to and through work and social zones across the office. A comprehensive program of accessories and screens enables people to work efficiently and effectively, while also contributing to "place-making" and a distinct work culture.

Expansion Cityline is set apart by an innovative beam framework that permits 90-degree connections in multiple directions that route power and data throughout the space with a single in-feed.

The unique beam structure allows for both single- and double-sided planning formats, while also balancing individual work areas with spaces suited to group work and social interaction.

Expansion Cityline creates space-efficient benching layouts, with beam-mounted storage used to divide and define individual workspaces. A choice of fascias, including glass, fabric and felt, allows for textural and functional variety. Accent colors on the beam structure invigorate a space and can be used to identify work zones. Beam-mounted cabinets

and storage towers integrate with the beam infrastructure, routing power/data through the office. Used as a freestanding fence adjacent to the workstations, the beam combines with lounge seating to permit quick transitions to casual collaboration.

Expansion Cityline's beam structure offers seamless integration of a height-adjustable run-off that allows users to alternate between a seated and standing position with ease. A light, open look is achieved by planning

multi-layered workstations off the beam and dividing spaces with glass screens that maintain a sense of transparency and openness.

As a power distribution fence, the Expansion Cityline beam integrates with height-adjustable tables—allowing people to opt for alternate postures that serve performance, comfort and well-being.

A variety of storage products and screens can be added to configure and reconfigure the work area as needed. Felt screens bring a warm, inviting look to the workspace.

As a standalone fence in an open, active environment, the power-enabled beam provides a structure and a focus for work or socializing. Expansion Cityline also offers an array of storage options, accessories, tops and screens that combine to support

a multiplicity of work activities. Casual ottomans, task chairs and high-back seating complete a fluid work zone that allows people to pursue diverse individual and group goals.

Combining soft forms and materials with a fence structure provides a short-term, light-scale experience in touchdown workstations. A height-adjustable table with accessible power/data and storage for personal items

delivers functionality throughout the day. Accent Colors energize the space and identify team neighborhoods or work zones.

A 120-degree beam connection provides a curved workspace, and users with the natural, organic range of motion to enhance ergonomics. Supplementing the standard-height fence is a low-height fence. Designed to be used with height-adjustable tables,

it reduces creepage between the fence and table and, as an integrated modesty panel, affords added privacy. A mobile pedestal with hidden casters slides easily over the height-adjustable table foot, maximizing leg room.

Expansion Cityline creates an engaging, multi-functional space with minimal barriers to interaction. The beam easily spans 12 feet with a minimum of support, creating a clean aesthetic and providing

ample legroom. The mix of fabric and glass elevated screens, together with elevated cabinets, enhances functionality yet maintains the sense of openness and simplicity.

collaborative/gathering areas

Expansion Cityline fosters community by creating spaces equipped with casual seating and a variety of collaboration tools. A freestanding couch nestled between workstations offers casual zones. Suspended credenzas with a felt seat pad offer both

comfort and choice. The workspace can also incorporate a 42-inch-high peninsula that empowers users to stand while sharing ideas. In another scenario, freestanding tables and markerboards provide collaborative tools along with access to power off the structural beam.

storage & accessories

A robust selection of accessories and screens enables people to work efficiently and effectively, while also contributing to “place-making” and a distinct work culture. People feel comfortable and empowered as they pursue individual and collective goals.

01 modular accessories

The use of metal offers robust construction for accessories that are often moved from place to place. Metal also permits a punch of color when desired. Storage with a metal front provides the option of a thinner front detail in the workstation.

02 recessed pulls

Recessed pulls in Accent Colors elevate the aesthetic and provide a unique look tailored to the brand. Storage Fronts are available in metal and laminate.

03-04 beam-mounted accessories

To complete fence applications, signature beam-mounted accessories provide added functionality and accommodate personal belongings.

05 box drawer organizer

Designed for use in mobile storage box drawers, the organizer also works well on the worksurface. An optional Felt Drawer Liner adds protection to the box drawer.

06 beam-mounted cabinet

Providing accessible storage at worksurface height, the Beam-Mounted Cabinet also divides space and offers the option of a Back Fascia in fabric, felt or magnetic back-painted glass.

07 storage organizer

Drawer interiors can be reconfigured using the Storage Organizer, which is designed with two segments that can be used side-by-side or stacked.

08 elevated storage

An Elevated Desk Shelf with Felt Units and repositionable accessories, and Elevated Slim Cabinets, divide space and provide light storage capacity.

sit & slide screens

A broad range of screen options enables users to personalize the work area. Sit & Slide screens are easily relocated to manage visual privacy and focused work. They are available in a choice of materials to complement aesthetics and achieve desired function.

01 metal with felt accessories

Metal screens with felt accessories feature a magnetic surface for display, plus integrated bin, cup and tray to keep work tools organized and close at hand.

02 metal with whiteboard

A metal surface with optional painted whiteboard captures ideas and notes.

03 felt

The tackable felt surface allows various materials to be posted for display and reference. It is available in two colors.

04 adjustable placement

Sit & Slide screens are easily relocated to manage visual privacy and focused work.

05 felt stitching

All Felt Screens feature stitching detail available in three accent colors or color-matched.

space division

Expansion Cityline offers a selection of screens to divide space above and below the worksurface. Various finishes and materials create a distinct aesthetic while meeting diverse functional needs and budget guidelines:

- Glass enhances transmission of light
- Fabric and felt offer tackable surfaces
- Magnetic glass or metal support display
- Writable glass and metal whiteboard paint offer a surface for quick notes
