

teknion wilkhahn AT

teknion

Teknion® has partnered with Wilkhahn to offer the Wilkhahn AT chair by Teknion. Wilkhahn AT features fluid lines and sculpted forms that accord with the contours of the human body. Simplicity in design and function yields an approachable task chair that invites users to discover an intuitive experience of high-performance ergonomics and effortless comfort while seated over time.

Wilkhahn AT applies intuitive Free-2-move capability called Trimension®—a unique three-dimensional design that synchronizes the seat back and seat pan pivot points with automatic weight adjustment. As a result, the chair provides instant support. Users need only to sit, adjust the seat height and allow the body and chair to work in harmony.

Designed to permit a full range of motion, Wilkahn AT with Trimension® synchronizes with the body as users lean forward, turn to the side or relax back. Trimension® combines the 3D synchronous adjustment mechanism

with a highly elastic seat and backrest to reflexively adapt to any shift in position or posture. With complete ease, the body is supported and maintains its center of gravity at all times.
