

A woman with long dark hair, wearing a grey short-sleeved top and large hoop earrings, is sitting at a dark desk. She is smiling broadly and looking towards the right. In her hands, she holds a smartphone. On the desk in front of her is a white smart outlet with two USB ports on the left and a standard AC outlet on the right. The background is a blurred office or home workspace with a bookshelf and a laptop.

MhoB

MhoB

MhoB

MhoB boasts the best of Byrne's popular Mho product, but with some thoughtful, new features. Like a paintable surface for endless creative possibilities, and a durable, streamlined construction that makes it more affordable than ever. MhoB's one-touch, retractable door design allows it to remain open during use for easy access. It even offers a variety of power/USB options with 2, 3, or 5 Port configurations—all of which means MhoBenefits for you.

M2XB

M2XB, like Byrne's popular M2X, is perfect for busy workspaces and conference areas where people gather—with a back-to-back configuration that allows users easy access from either direction. The double-sided, one-touch design also supports a customizable line up within a minimal footprint, for power just the way you need it. But M2XB goes M2X one better—with new features like a powder coated aluminum finish, and durable, seamless construction that make it as design-friendly (and cost-effective) as it is powerful.
