coloured frames thrislington product options

The cubicle framework on our aluminium framed systems **Oasis**, as shown here, and **Full Height Oasis** can be powder coated to any RAL/Pantone reference or colour anodised. The frames can either complement the colour of the door material or be a striking contrast.

Along with intelligent placement of the foot, we've suspended **Oasis** from the headrail to create what appears to be a fully aluminium framed cubicle that floats.

Engineered 303 grade stainless steel hardware and our unique hydraulic closer, concealed within the aluminium headrail, ensure that the suspended doors soft-close beautifully and silently every time, eliminating slamming.

Also shown to the left is our **Fino** collection waste receptacle and towel dispenser, in a matching powder coated black.
